B-HIVE
135 g/mq
100% POLYESTER

Innovativo tessuto costruito con una particolare trama ad alveare formata da micro camere d'aria. La nuova combinazione di filati riesce a garantire un notevole effetto traspirante ed estrema leggerezza. Una minor quantità di tessuto a contatto con la pelle, grazie alla presenza di minuscole camere d'aria, consente, infatti, una straordinaria regolazione della temperatura corporea e una sensazione d'intenso comfort. Il filato è doppio e composto da fibre di tonalità diverse per ottenere il caratteristico colore "melange", un effetto chiaro scuro ottenuto con una doppia tintura tipica dello stile tempo libero. Dalla mano morbida e confortevole il tessuto segue ogni movimento del corpo con straordinaria naturalezza. Anche il nuovo tessuto B-HIVE è certificato Oeko-Tex® Standard 100 e non rilascia sostanze nocive per la pelle e dannose per la salute.

An innovative fabric with a special honeycomb weaving made up of micro air chambers. The new combination of threads guarantees remarkable breathability and extreme lightness. Less fabric which comes in contact with the skin thanks to the minute air chambers guarantees extraordinary regulation of body temperature and a feeling of immense comfort.

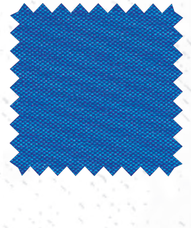

The two-ply thread is made up of different colours in order to obtain the characteristic mélange, a light-dark effect obtained with a double dyeing that is typical of the leisurewear style. Soft and comfortable to the touch, the fabric follows every movement of the body with a natural flow. The new B-HIVE fabric is also Oeko-Tex® Standard 100 certified and does not release substances which are harmful to the skin or constitute a health risk.

Tissu innovant réalisé à l'aide d'une trame alvéolée formée de micro-chambres à air. Ce nouveau mélange de fils assure un important effet respirant doublé d'une extrême légèreté. En effet, la présence des minuscules chambres à air réduit la quantité de tissu en contact avec la peau, ce qui régule considérablement la température corporelle et apporte un confort extrême. Le fil double composé de fibres de tonalités différentes présente une couleur chinée caractéristique, un effet clair-obscur issu d'une double teinture typique des vêtements destinés au temps libre. Doux et confortable, le tissu suit tous les mouvements du corps avec un naturel extraordinaire. Le nouveau tissu B-HIVE est lui aussi certifié Oeko-Tex® Standard 100 et il ne libère aucune substance nocive pour la peau ou la santé.

TECNOLOGIA IN AZIONE

Dopo più di 3 anni di ricerche, decine di prototipi progettati e oltre 100 test approfonditi eseguiti da atleti professionisti di oltre 30 sport in gara e allenamento, Erreà Sport® presenta Active Tense®. Progettata grazie alla collaborazione di osteopati, fisioterapisti e atleti professionisti, ACTIVE TENSE® è l'esclusiva e unica linea di abbigliamento dotata di un esoscheletro flessibile interno a ogni capo. Active Tense® è ispirato al concetto di taping e della chinesiologia e studiato con lo scopo di garantire un'ineguagliabile stabilizzazione delle articolazioni e dei muscoli durante l'attività fisica. Il disegno unico biodinamico di Active Tense® e la sua speciale costruzione ergonomica brevettata assicurano una perfetta aderenza al corpo seguendone i movimenti naturali. La speciale costruzione a superfici differenziate consente, inoltre, una rapida dispersione del sudore insieme a una ventilazione efficace in grado di mantenere il corpo asciutto per offrire il massimo comfort. Active Tense® è 100% Made in Italy e certificato OEKO-TEX® Standard 100 per garantire i massimi standard di sicurezza e qualità.

TECHNOLOGY IN ACTION

Following more than 3 years of research, dozens of prototypes and over 100 tests carried out by sporting professionals in more than 30 different disciplines in competitions and training, Erreà Sport® presents Active Tense®. Designed in collaboration with osteopaths, physiotherapists and professional athletes, ACTIVE TENSE® is the only line of sportswear to feature a flexible exoskeleton embedded in each garment. Active Tense® was inspired by kinesiology taping to provide exceptional joint and muscle stabilization during exercise. The unique biodynamic design of Active Tense® with its one-of-a-kind patented ergonomic design ensure the perfect fit while accompanying the body's natural movements. The use of multiple surfaces ensures rapid sweat dispersion and effective ventilation to keep the body dry and comfortable. Active Tense® is 100% Made in Italy and OEKO-TEX® Standard 100 certified to guarantee the highest safety and quality standards.

TECHNOLOGIE EN ACTION

Après plus de 3 ans de recherches, des dizaines de prototypes et plus de 100 tests approfondis exécutés par des athlètes professionnels de plus de 30 sports, pendant les compétitions et les entraînements, Erreà Sport® présente Active Tense®. Mise au point avec la coopération d'ostéopathes, physiothérapeutes et athlètes professionnels, ACTIVE TENSE® est une ligne de vêtements exclusive et unique dotée d'un exosquelette flexible inséré à l'intérieur de chaque vêtement. Active Tense® s'inspire du concept de « taping » et de la kinésiologie et a été conçue dans le but d'assurer une incomparable stabilisation des articulations et des muscles pendant l'activité sportive. L'exclusif dessin biodynamique d'Active Tense® et sa spéciale construction ergonomique brevetée assurent une adhérence parfaite au corps en accompagnant ses mouvements naturels. La construction spéciale à surfaces différenciées permet en outre une dispersion rapide de la sueur ainsi qu'une ventilation efficace pouvant maintenir le corps sec pour offrir le confort maximum. Active Tense® est 100% Made in Italy et certifié OEKO-TEX® Standard 100 pour assurer les niveaux maximums en termes de sécurité et qualité.

COME FUNZIONA

L'esoscheletro interno dei capi Active Tense® supporta i movimenti naturali del corpo, migliorando la postura senza limitare la libertà di movimento con un effetto stabilizzante sia attivo che passivo.

STABILIZZAZIONE ATTIVA

La stabilizzazione attiva è un supporto graduale ai muscoli e alle articolazioni che serve a migliorare i movimenti naturali del corpo, mantenendoli nel giusto binario ed evitando movimenti potenzialmente scorretti e dannosi.

STABILIZZAZIONE PASSIVA

La stabilizzazione passiva agisce da guida funzionale, suggerendo al corpo come mantenere una postura più appropriata e coadiuvando muscoli ed articolazioni a mantenere un adeguato allineamento.
Active Tense® aiuta, inoltre, a ridurre le vibrazioni a cui sono sottoposti i muscoli e, quindi, l'affaticamento durante e dopo lo sforzo fisico, e a migliorare la propriocettività, ovvero la capacità di percepire e riconoscere la posizione del corpo nello spazio, sensibilità fondamentale per il controllo del movimento. Grazie all'elevato sostegno articolare e muscolare, e la conseguente riduzione dello stress corporeo, Active Tense® può anche promuovere un più rapido recupero post-infortunio.

HOW DOES IT WORK

The embedded exoskeleton in Active Tense® garments supports the body's natural movements by improving posture without inhibiting freedom of movement through a combination of active and passive stabilization.

ACTIVE STABILIZATION

Active stabilization offers graded muscle and joint support aimed at enhancing the body's natural movements, keeping them on the right path and eliminating movements that are wrong or unnatural.

PASSIVE STABILIZATION

Passive stabilization is a functional guide that encourages the body to adopt an appropriate posture and helps muscles and joints to stay properly aligned. Active Tense® reduces muscle vibration and therefore fatigue during and after exercise while improving proprioceptivity, the capacity to perceive and recognize the position of the body in space, a crucial aspect of movement control. Thanks to its exceptional levels of support for joints and muscles and the resulting reduction of stress for the body, Active Tense® also ensures improved post-injury recovery times.

COMMENT CELA FONCTIONNE

L'exosquelette interne des vêtements Active Tense® accompagne les mouvements naturels du corps, améliorant la posture sans limiter la liberté de mouvement avec un effet de stabilisation actif et passif.

STABILISATION ACTIVE

La stabilisation active offre un soutien graduel des muscles et des articulations servant à améliorer les mouvements naturels du corps, tout en les maintenant dans la position correcte et évitant des mouvements potentiellement erronés et dangereux.

STABILISATION PASSIVE

La stabilisation passive agit comme un guide fonctionnel, aidant le corps à maintenir une posture plus appropriée et permettant aux muscles et aux articulations de maintenir un alignement correct.
Active Tense® aide en outre à limiter les vibrations auxquelles les muscles sont sujets et, par conséquent, la fatigue pendant et après l'effort physique ainsi qu'à améliorer leur proprioceptivité, soit la capacité de percevoir et reconnaître la position du corps dans l'espace, ce qui est fondamental pour le contrôle du mouvement. Grâce à l'excellent soutien articulaire et musculaire et à la limitation conséquente du stress corporel, Active Tense® pourrait aussi promouvoir une récupération plus rapide après un accident.
